

Services of general interest in the EU: *a citizens' perspective on public versus private provision*

2014-2017

JEAN MONNET NETWORK

The EUsers structure in a nutshell

The EU users objective

FOCUS:

- *Services of General Interest (SGI)*, which are recognised to be *a key aspect in fostering European social and territorial cohesion* and ensuring the enjoyment of fundamental rights to EU citizens.

OBJECTIVE :

- *Analyse SGI* through the lenses of citizens as users and create a debate on *the public or private nature of their provision* in terms of consumers' welfare effects.

KEY QUESTIONS:

- How should governments define the mission, performance criteria, and governance mechanisms of public enterprises providing SGI?
- How should they regulate the enterprise if provision is private or mixed?

Innovation and services of general interest: from the lab to enterprises and citizens

22 – 24 June 2017

Palazzo Greppi, via Sant'Antonio 12, Milan (IT)

- The workshop will discuss the **role played by governments to foster and generate innovation in the SGI for enterprises and final users.**
- It will focus on the **multiple ways public institutions perform directly research and support the flow of new knowledge** from research laboratories to innovation in enterprises and finally to citizens.
- **Key Research Questions:**
 - *What are the channels through which governments support research?*
 - *How do governments, development agencies and public enterprises address their strategies towards innovation?*
 - *How does innovation penetrate in key sector of general interest such as energy, telecommunication and health systems?*
 - *What is the role of public research infrastructures and how their outcomes are transferred to the market?*
 - *How do consumers and enterprises benefit from public research?*
